

Living things and their habitats	Animals including humans	Properties and change of materials	Earth and Space	Forces
----------------------------------	---------------------------------	------------------------------------	-----------------	--------

Year 5 - Animals including humans

Knowledge

- To know the changes as humans develop into old age.
- To know the gestation period of other animals and humans.

Skills

- **recording data and results of increasing complexity using scientific diagrams and labels**

This could be achieved by finding patterns in the growth process linked to ageing. labelling diagrams to show before and after puberty or other changes that occur during pregnancy (e.g. a growing foetus – the differences at different stages of development). This could be achieved by finding patterns in the above collected data.

(Observing Over Time & Pattern Seeking)

<u>Vocabulary</u>	
Puberty	Elderly
Sibling	Retirement
Offspring	Gestation
Young	Life cycle
Adult	Period
Teenager	

Pre-loading (from other science strands that link to this area)

- Animals including humans (Y6) – When discussing the lifecycle of humans, discuss how living a healthy lifestyle (exercise and balanced diet) can support progression through each stage.
